EXPERIENCE

•Lowe's India

July 2024 – Present

Associate Software Engineer

- Work full-stack on an internal competitive pricing analysis platform – building the React front-end and the Java (Spring Boot) REST APIs behind it.
- Write unit tests with JUnit to keep backend changes reliable across frequent releases.

PROJECTS

•Interactive 3D Portfolio

Explorable first-person 3D portfolio, replacing a static portfolio page

- Built with Three.js, rendering a custom Blender-modeled space exported through a self-written Python vox-to-mesh converter (face culling, custom GLB writer).
- Implemented click-to-move navigation, dynamic proximity-based camera control, and object interactions (doors, lighting) without requiring keyboard controls.

•Sidepup – Chrome Extension

Desktop pet productivity app with a to-do list

- Built on Manifest V3 with Shadow DOM for UI isolation; used chrome.alarms and chrome.storage.local for scheduling and persistence.
- Implemented a full animation state system, a shelf-bar UI, daily task prompts with OS notifications, and snooze/task-carryover logic.

•Appy's Slam Book

Link-invite digital slam book – no accounts, the invite link is the credential

- Built and shipped all 8 backend REST API routes on Cloudflare Workers, D1, and R2 – book creation, invite token minting, friend page view with self-healing token expiry, direct-to-R2 file uploads, and a read-only keepsake view.
- Building the React + Vite front-end with react-pageflip for a real page-turning flipbook interaction (in progress).

TECHNICAL SKILLS

Languages: JavaScript, Python, C++

Frontend: React, Three.js, HTML, CSS

Backend: Java (Spring Boot), REST API design, MySQL

Testing: JUnit

Cloud: AWS (EC2, Lambda, IAM, CloudWatch), Cloudflare (Workers, D1, R2)

Tools & Platforms: Chrome Extension APIs (Manifest V3), Blender, Git

Design: UI/UX, Figma, Adobe XD

EDUCATION

•R V College of Engineering, Bengaluru

B.E, Electronics & Communications Engineering

CGPA: 7.85

2020 – 2024

CERTIFICATIONS

•Cloud Computing with AWS

Oct 2023 – Nov 2023

CloudPlus AI Tech

- Hands-on with core AWS services – virtual machine deployment, AWS Lambda, IAM role management, and monitoring via CloudWatch.
